To Correspondents

1st. All orders should be sent in as early as possible.

2d. Orders should be legibly written out on a separate sheet and not mixed up in the body of the letter, thereby saving us a great deal of trouble, and tending to prevent mistakes.

3d. The articles in the following list will be furnished at the annexed prices *only* when the quantity specified shall be taken. FIFTY, however, will be furnished at the HUNDRED rate, and FIVE at the TEN rate. In no case does this mean so many trees of assorted classes, but, like the prices in the body of the catalogue, refers only to one class of assorted varieties, for instance, 5 Apples, or 5 Pears, or 5 Plums, of different varieties, but not 2 Apples, 2 Pears, and 1 Plum.

4th. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated whether, and to what extent, substitution will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of varieties is left *entirely* to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

5th. All trees and plants are carefully labeled, and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material only, will be made; but no charge is made for the delivery of packages at the railroad or express offices at Niles.

6th. It is requested that explicit directions for marking and shipping packages accompany each order. When it is left for us to choose the mode of conveyance, we will exercise our best judgment; but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the forwarders.

7th. Our customers are requested to notify us immediately of any errors that may be committed in filling their orders, so that we may at once rectify the same, as we desire to conduct our business in all respects satisfactorily to those who favor us with their confidence.

8th. Orders from unknown correspondents *must* be accompanied by the cash, or satisfactory reference. Orders to be sent C. O. D. *must* be accompanied by at least one-half the amount in cash; otherwise, they will receive no attention.

9th. Remittances may be made by draft on San Francisco, Wells Fargo & Company's and postoffice money orders on Niles, or cash by express, prepaid.

10th. Orders priced at single rates, and not exceeding four pounds in weight, can be forwarded by mail, postage paid; but when possible we recommend having them sent by express, as we are then able to send much stronger and better plants.

All communications to be addressed to

CALIFORNIA NURSERY COMPANY,

NILES, CALIFORNIA.

Remarks

In submitting to our friends, and the public generally, our Price List for the coming season (Sixteenth Edition) we desire to return our sincere thanks to our numerous customers for the very generous patronage bestowed on us in the past, and earnestly desire for a continuance of the favors of our many friends. From those who have not dealt with us heretofore we solicit at least a trial order. It is our aim and intention to supply only the best stock at the lowest prices consistent with the quality of the goods offered. Our selection is larger and more varied than ever. A cordial invitation is extended to all to visit our grounds, whether as intending purchasers or otherwise.

To reach our Nursery from San Francisco, take the broad gauge ferry boat for Oakland, leaving at 8:00, 8:30, 9:00 and 11:00 o'clock A. M., and 3:00, 4:30 and 6:00 P. M. These make close connections with through trains direct to Niles. From Sacramento and all points centering there, the train leaving at 10:25 A. M. for San Francisco, via. Lathrop, Tracy, Livermore, etc., should be taken. From San Jose and its southern connections, trains leaving at 5:45, 6:35 and 9:20 A. M., and 12:10 and 5:00 P. M.

Very Respectfully,

CALIFORNIA NURSERY COMPANY.

WM. J. LANDERS, President, H. W. MEEK, Vice-President,
JOHN H. HENN, Secretary, CENTRAL BANK, Oakland, Treasurer,
JOHN ROCK, Manager.

DIRECTORS:

WM. J. LANDERS,	JOHN H. HENN,	E. E. USLAR,
A. C. HAMMOND, JR.,	E. B. STONE,	F. W. HOSMER,
	H. W. MEEK.	

Special Notice

Those only who can show a certificate of recent date, with our signature and the seal of the company attached, are authorized to solicit orders for us. We wish to call special attention to this notice, as we know it has heretofore been the practice of unprincipled persons to procure the catalogues of prominent nurseries and take orders in their names, which they fill with poor stock bought elsewhere. If our patrons will notify us of any person whom they have reason to believe is not a regularly appointed agent, we shall consider it a favor.

Hints on Transplanting

The many excellent treatises on Fruit Culture which have appeared within the past few years—one or more of which should be in the hands of every person intending to plant—render it almost unnecessary to give any directions in that line; yet we are so frequently asked for advice in this way, that we have concluded to offer a few general remarks.

The situation of the orchard having been decided on, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots, when spread out in their natural position. In planting, the top soil should be broken down into the hole, and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may in light soils stand from two to three inches deeper than it stood in the nursery; but in heavy clay or wet ground it is advisable to have it stand at the same height as it was before transplanting.

On account of our long, hot, dry summers, we have found it beneficial to shade the sunny side of the tree with a board or shake stuck in the ground a few inches away from it, for the first two or three years. The tops should be shortened in more or less, in proportion to size and variety of tree and condition of roots.

A work, "California Fruits and How to Grow Them," by Prof. E. J. Wickson; the "Raisin Industry," by Prof. Gustav Eisen; and "Grape Culture and Wine Making," by Geo. Husmann, will be found very useful to all horticulturists, written as they are for this coast, and by authors of wide local experience.

Rule—Square Method.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

Rule—Equilateral Triangle Method.—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

FRUIT DEPARTMENT

All our Fruit Trees are grown on WHOLE Seedling roots. The advantages of these in promoting the health and thriftiness of trees over others grafted on pieces or sections of roots, or budded on stocks grown from cuttings, is acknowledged by the best authorities, and is easily apparent to the most casual observer. **All two-year-old trees are branched low and are stocky, having been cut down, or headed back when yearlings,** two feet above ground, except where noted.

Plum—On Myrobolan, Climax, 1 year.....3 to 5 ft.	50	4 00	
Originated by Mr. Luther Burbank. Fruit very large, heart-shaped; color of flesh, yellow; sweet and delicious; skin thick, firm, deep vermillion red; a superbly rich plum, ripening middle of July, before any other good plum, and the past season commanded the highest price in the Eastern markets. Tree a vigorous grower, and very productive.			
Prune—On Myrobolan, Sugar, 1 year.....3 to 5 ft.	50	4 00	
Another of Mr. Burbank's introductions. An extremely early prune; very large; ripens August 1st; cures superbly rich, with a yellow flesh, tender and rich in sugar juice; skin very tender, at first of a light purple, tinted with green, changing at maturity to dark purple, covered with a thick, white bloom. Valuable in localities where the French prune ripens too late for sun drying. Tree an unusually vigorous grower, and very productive.

TRAINED TREES

This class includes a variety of large-sized trees, whose straight, regular stems were headed back or cut down to a uniform height of nine feet, and handsome, well-formed heads grown thereon. They are in splendid shape for planting on avenues, streets or roadside, for immediate effect. With ordinary care, little or no loss should occur in moving them, as they have been frequently transplanted.

Evergreen Trees and Shrubs

Nearly all the plants mentioned under this heading have been transplanted once or oftener, thereby adding greatly to the certainty of their growing. In order to reduce the amount of soil and consequent high freight charges, especially in shipping to distant points, we have grown those varieties most in demand in pots.

Palms

Palms have now become almost indispensable in all decorations, whether for apartments, or conservatories, or the production of tropical effects in landscapes. When planted out, no class of plants makes such a grand display, and none are of more easy culture. Rich soil, mulching, and watering will in a short time produce grand specimens.

While our main stock of these highly desirable garden ornaments is grown in the open ground, thereby obtaining the finest plants, we also cultivate more or less of each variety in pots or boxes. These are well-established, well-furnished specimens, suitable for hall or house decorations, or, where immediate effect is desired out-of-doors, they can be used to great advantage, being almost absolutely safe from any setback. We distinguish the hardy sorts with an *.

A list of large specimen plants, of palms, etc., not enumerated in this catalogue, will be mailed upon application.

The plants offered are strong and vigorous, have been grown entirely in the open ground, and consequently will not require the careful nursing necessary to those propagated under glass in three months' time, and sold at low rates. They cannot fail to give entire satisfaction the first summer after planting. From November to March they can be shipped in a dormant state, packed in moss. Varieties marked with an * can be had budded in tree form (usually called **standards**) on a single stem three to four feet high. For culture best adapted to each class, we refer to our Descriptive Catalogue No. 2.

Price: each, 25 cents; per 10, $2; per 100, $18. **Standards, $1 each.**
